

Herbert Breunung

doing

OO

right

no comment

OO features

- private attr. & methods
 - autogen: get, setter
- constructor, destructor
 - signatures
- Multi Meth. Dispatch
 - delegation

OO features

- fast

OO features

- fast
- nice syntax

OO features

- fast
- nice syntax
- parameter types

OO features

- method hooks
 - marshalling
- third scope / class types
 - better error messages
 - separate error channel
- works with normal objects

OO bonus

- unbreakable
- optional parameter
- no inheritance (roles)

Method hooks

for util classes

3 scopes

- public
- private
- access

marshalling

autogenerated

extra constructor

\$obj → restate(...)

error handling

good

autogenerated

error messages

error channel

separate to
return value

unbreakable

**no direct access
to parameter
or attributes**

optional

use parameter
positionally
or named

no inheritance

it is a code smell
